Education

- **National Taipei University of Technology** — Taipei, Taiwan
  M.S. in Electronic Engineering (View Transcript) — *Jul 2024 – Aug 2026*
- **Soochow University** — Taipei, Taiwan
  B.S. in Computer Science and Information Management (View Transcript) — *Feb 2021 – Mar 2024*

Summary

AI and full-stack engineer with hands-on experience in backend API development, database design, web development, and cloud deployment. Maintained and refactored large-scale language-learning and construction-bidding platforms, delivering REST APIs, database solutions, Vue-based admin-system modernization, and SEO improvements. Experienced in RAG, LLM, and AI agent application development, from environment setup and system development to deployment and operations.

Experience

- **Pegatron Corporation** — Taipei, Taiwan
  AI Engineer — *Sep 2026 – Present*
- **National Taipei University of Technology, MMSLAB** — Taipei, Taiwan
  Backend & Web Developer — *Jul 2024 – Aug 2026*
  - **iTalkuTalk**: [Website | App Store | Google Play] Maintained and refactored backend APIs, database structures, and web features for a large-scale language-learning platform. Rebuilt a difficult-to-maintain EJS admin system with Vue, integrated APIs, and improved maintainability and usability.
  - **HomeEasy**: [Website | App Store | Google Play] Developed backend APIs, database solutions, and web features for a multi-platform interior construction bidding service; resolved functional and workflow issues. Improved metadata and SEO configuration based on Google Search Console and SEO audit recommendations.

Publications

- *Easy RAG Implementation: Building Hallucination-Free LLM And Generative AI With NVIDIA Microservices*, Shih-Chia Huang, Fu-Shun Chang, DrMaster Press, October 2026.

Course Projects

- **Virtual File System**: [GitHub] Built a virtual file system in C with commands including vi, ls, mkdir, and rm; designed SuperBlock, INode, and Block data structures for disk-space management. Applied a modular core, command, and editor architecture for allocation, path parsing, file operations, and text editing.
- **Pay Off Bar**: [Demo Video | GitHub] Designed backend APIs and data structures for group expense tracking, friend relationships, and payment-status management. Integrated Firebase Cloud Messaging to deliver real-time payment reminders and status notifications.
- **Skin Identification App**: [GitHub] Integrated a skin-recognition model into a mobile application for capturing, recording, and tracking skin-health information. Implemented Google sign-in, user-account features, and user-data management.

Skills

- **Backend & Databases**: .NET, Node.js, Express, REST APIs, MVC, database schema design
- **Frontend**: JavaScript, HTML, CSS, Vue, Nuxt, EJS, SSR, CSR, SEO
- **Cloud & DevOps**: Docker, Git, GitHub, Jenkins, AWS (EC2, Elastic Load Balancing, Lambda, ECR, S3), Cloudflare (DNS, Tunnel, Load Balancing)
- **AI Applications**: RAG (Vector, Graph, Hybrid), LLM deployment and inference, Ollama, NVIDIA NIM, Google AI Studio, LangChain, LangGraph, MCP, AI Agents, OpenClaw, Hermes
